# WE ARE PUBLIC PROVIDER IN STRATEGIC SECTORS

Digitalisation

Strategic consulting

Mobility

Urban development

Architecture and Urban Planning

Railway

Airports

Sustainability

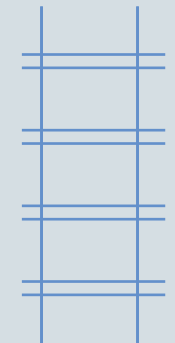

Roads

Air Navigation

Ports

#### ICONIC PROJECTS

Design of over 450 km of tunnels and more than 130 viaducts.

#### URBAN INTEGRATION

Integration of railway access in over 100 urban environments.

#### COMMUTER RAIL

Development of more than 15 master plans for Spain's commuter rail networks, benefiting over one million daily passengers.

## WE ARE SUSTAINABLE MOBILITY

#### CLIMATE EMERGENCY

Climate change resilience: analysis of over 50% of Spain's railway infrastructure plus Spanish airports.

#### SPANISH HIGH-SPEED RAIL

Participation in all phases of the development of Spain's high-speed rail network — nearly 4,000 km — and 12,000 km worldwide.

#### ERTMS DEPLOYMENT

Implementation across 10,000 km in Europe and 3,550 km in Spain, playing a key role in drafting technical interoperability specifications.

#### LEADING CONSULTANTS

Involved in all national strategic transport plans in Spain for over 30 years.

#### AIRPORT EXPANSION

Key role in major expansions of Spain's airports.

#### FUTURE OF AIR MOBILITY

At the forefront of urban air mobility, participating in European programs that define drone operation concepts and vertiport design.

#### ARCHITECTURE AND URBAN PLANNING

We have a multidisciplinary team of experts in design, planning, and urban management, as well as in the design and refurbishment of all types of transport terminals and landmark buildings.

#### AIRPORT MASTER PLANS

More than 80 master plans for airports in Spain and abroad.

#### AIR NAVIGATION SYSTEMS

Essential support for the Spanish aviation sector in its organisation, structuring, and optimisation.

#### ROADS

We support all State Road Departments and contribute to the digitalisation of the sector.

# WE ARE TRANSFORMATION...

## ...Digital and technological

### **DIGITAL TRANSFORMATION OF JUSTICE ADMINISTRATION:**

More than 500 professionals dedicated to its modernisation for the past ten years.

### **DEGREE AND NATIONALITY RECORD ACCREDITATIONS**

Consulting, process reengineering, and automation for the Ministry of Science, Innovation, and Universities.

### **HEALTH DATA LAKE**

Technical office for the definition and design of a National Health Data Space.

### **DIGITALISATION PLAN FOR PUBLIC ADMINISTRATIONS 2021–2025**

For the State Agency for Digital Administration (SGAD).

### **CYBERSECURITY OPERATIONS CENTER**

Analysis and consulting. Preparation of technical specifications and monitoring.

## ...strategic

### **STRATEGIC PLANS OF AESA, AEMET AND AESF**

Transformation and organisational improvement processes, helping to outline a roadmap that strengthens their key role in Public Service.

### **ADVISORY SERVICES TO THE SECRETARY OF STATE FOR DIGITALISATION AND AI**

- National Artificial Intelligence Strategy (ENIA).
- National Neurotechnology Center Consortium.
- National Strategy for Quantum Technologies and the Digital Europe Program.
- Synergies among projects within the Technological Specialisation Networks (RETECH).
- Strategic monitoring of Digital Skills (Generación D) and advanced digital data technologies.
- Legal and technological support in Cybersecurity.

## ...operational

### **RECOVERY, TRANSFORMATION AND RESILIENCE PLAN OFFICE**

Management of Next Generation funds: since 2021 with over 170 professionals.

### **PERTE CHIP**

Spain's Microchip and Semiconductor Strategy.

# WE ARE INNOVATION

### **AURA**

Cutting-edge technological solution designed for climate resilience and the protection of critical infrastructure. Recognized by NASA.

### **CHARLI**

An intelligent application for designing alternative routes for linear infrastructures such as railways, roads, or highways.

### **DIGAV**

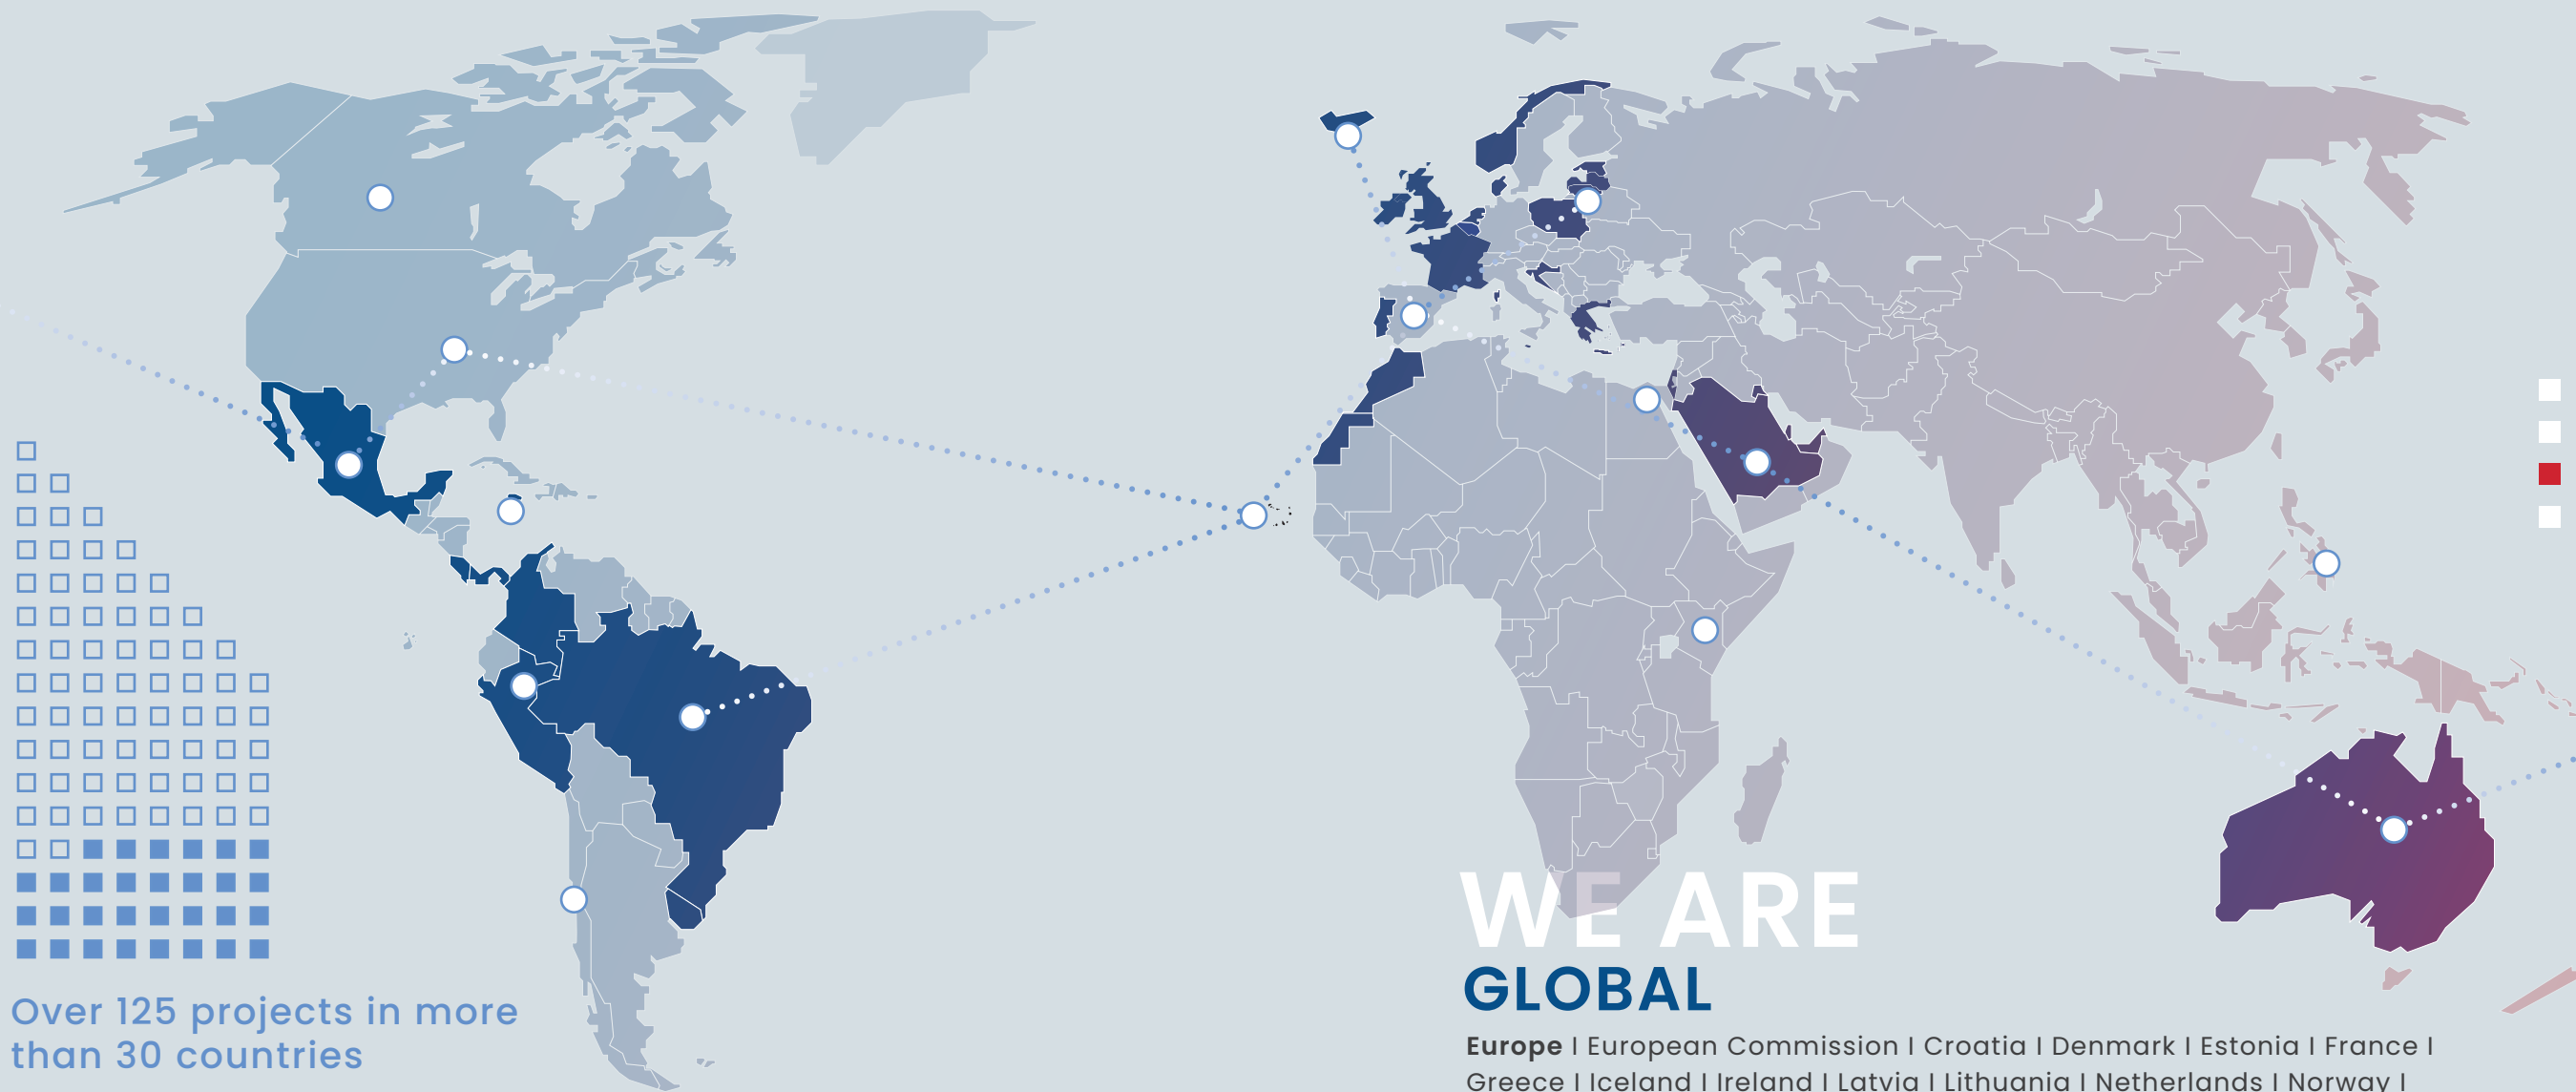

A device for automated railway track inspection and data processing using artificial intelligence.

### **TWINECO**

A digital twin for the maintenance of transport infrastructures.

### **InecoSAR**

A solution based on AI techniques and the analysis of Copernicus satellite images to monitor the life cycle of infrastructures.

Over 125 projects in more than 30 countries
